

Testimonial for the Meritus Team

Hi, my name is [Jack Lemvard](#), I would like you to read this testimonial that I have written about the Meritus team.

I drove in three events with Meritus, in 2007 coming in the middle of the year in Formula BMW Asia. Having had no previous experience in this formula racing, I was enabled by them to win in my first race, through the dedication, skill and professionalism shown to me by the team.

During my three races with Meritus I gained more racing knowledge than in my 10 previous years of racing.

When I was driving for the Meritus team I wasn't considered as just a driver, I felt like I was part of their family, a family that has taken years to build, and I was accepted into the family straight away.

The Meritus team taught me how to drive correctly and professionally, also elevating me in the Asian motor racing scene and they assisted me in becoming a better known "Figure" in Asian motor sport.

I haven't driven for Meritus for the last 2 years due to my contractual agreements but at every race that I attend, no matter what team I am racing with, if the team from Meritus are there I always find myself hanging out at the Meritus team pit, just because it has the best atmosphere.

I have now been with many teams through out my career and Meritus is still my favorite team and most professional team.

They are the only team that I know that are more interested in building a winning driver rather than just getting money.

Having raced with the Meritus team and seen how their 100% professional approach to racing is from both inside the team to their public image I truly believe this is the reason that they are the most successful team in the Asian motor racing scene.

The figures speak for themselves.

I would like to thank Peter Thomson and Firhat Mokhzani and the whole family at Meritus for letting me part of their operation. We are now working on the future.
